

Cleartouch Interactive TV

- [Getting Started](#)
- [Mirroring to the Cleartouch](#)

Getting Started

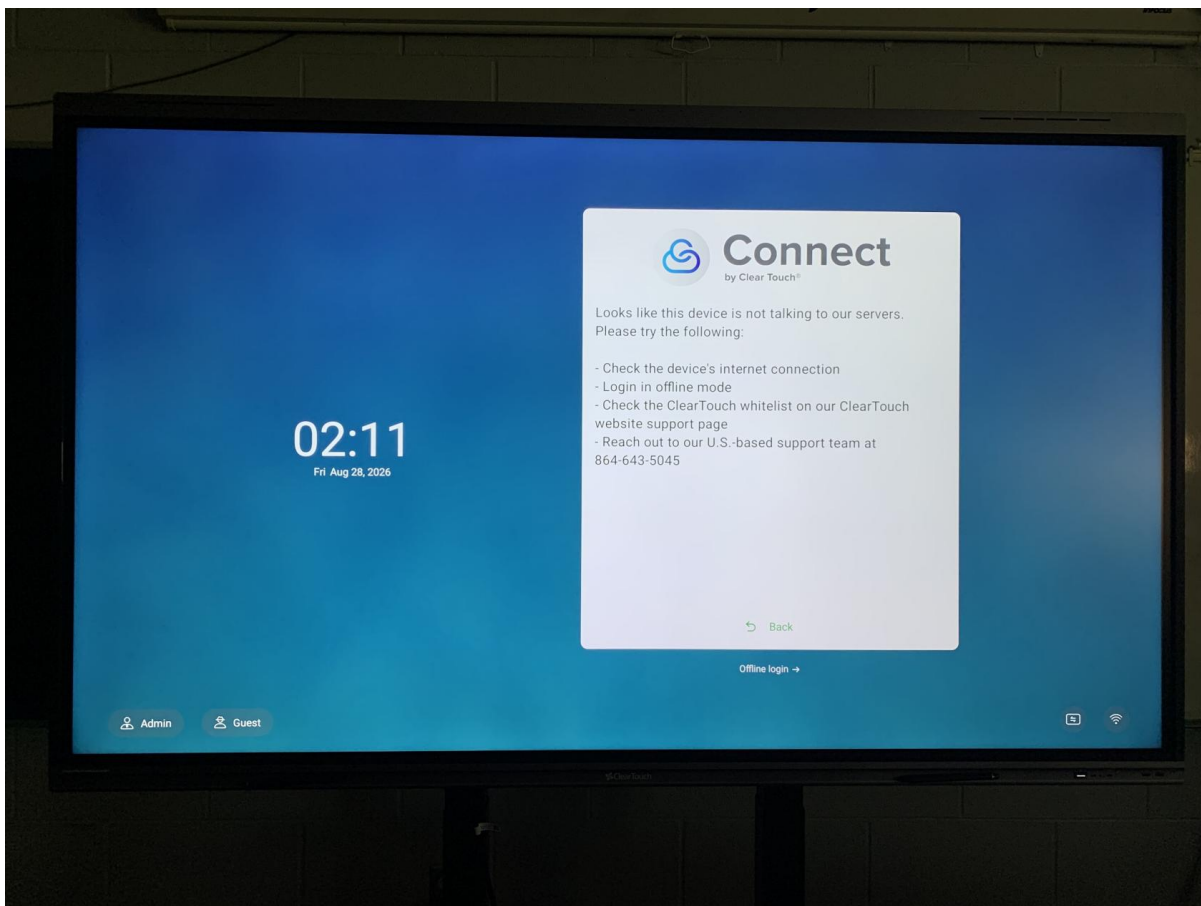

Logging In

When you start up your Cleartouch, you will be presented with a few options to log in. As of the writing of this article, you will log in as Admin. All Admin PIN codes should be the same, six zeros: 000000

The Guest login is for any other user that is not a teacher. For example, after school programs can log in as a guest and not interfere with the classroom teacher's accounts.

If you see this screen:

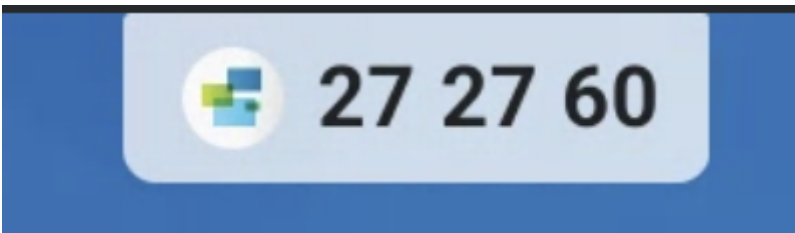

Don't be alarmed. The Cleartouch likely has internet connection, but the service that it connects to that tells if it is online or not is probably blocked by a filter. You should be able to log in and use the device anyway.

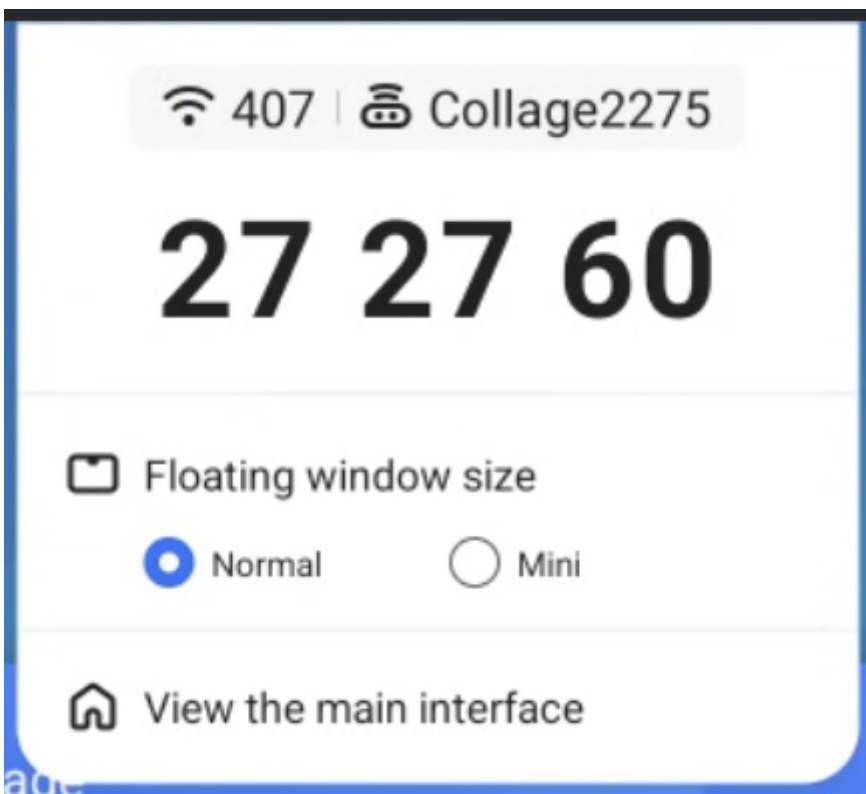

Mirroring to the Cleartouch

Mirroring to the Cleartouch TV from your Mac or iPad is the same as mirroring to your Apple TV. To make sure the setting is turned on follow these steps.

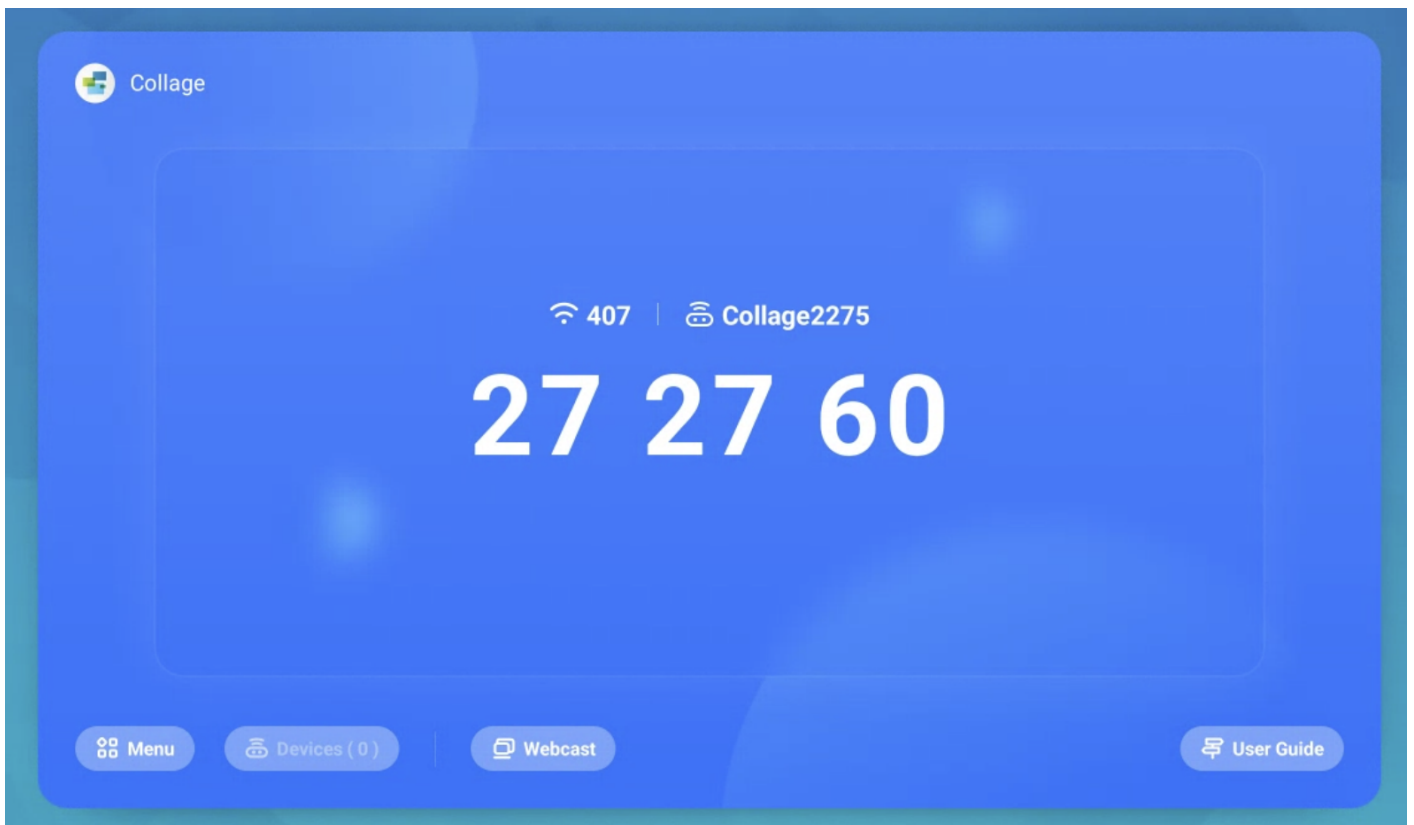

Tap this tab at the top of your screen

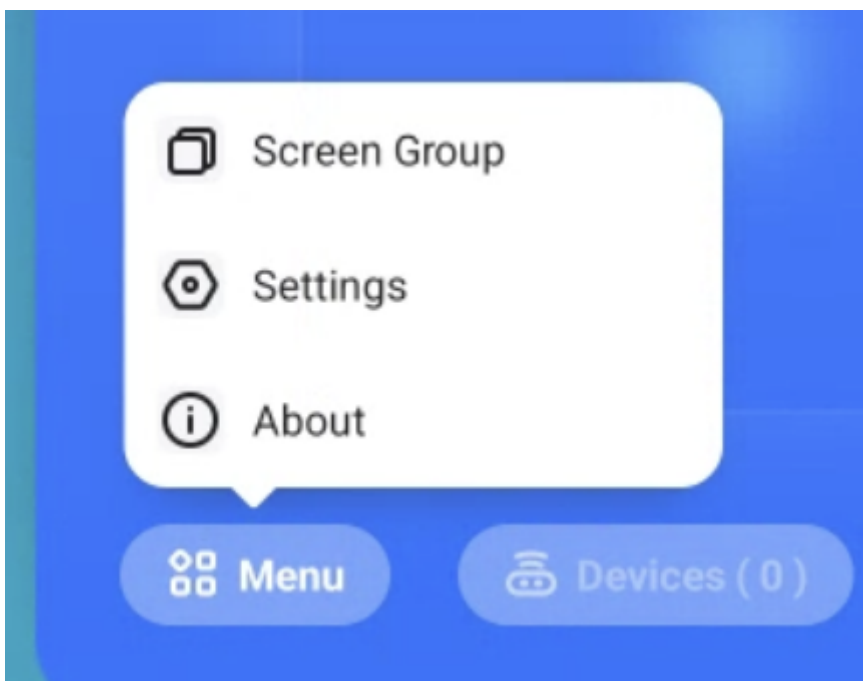

Then tap View the main interface

Tap Menu in the lower left

Tap Settings

Then scroll down to make sure the slider is blue for Support Airplay Device. Make a note of the Device Name and that is what should show up in your Airplay menu.

Settings

Screen sharing without client

Support Chromecast device

Support Airplay device

Support Miracast device

This function may occupy network resource, turn it off timely when not in use.
If the device cannot be searched, please try switching the Wi-Fi to 2.4G.
